Ask the user a question

If the user clicks cancel, then quit

Pick a random number

If the random number is 1 then:
Set the **text** to *"Concentrate and ask again"*
Set the **picture** to *"concentrate.gif"*

Otherwise, if the random number is 2 then:
Set the **text** to *"Very doubtful"*
Set the **picture** to *"doubt.gif"*

Display a messagebox with the randomly selected **text** and **picture**

All on one line:

```
question = easygui.enterbox(msg="Ask another
question",title="The Magic 8-Ball",image="ball.gif")
```

```
if question == None: break
```

```
choice = random.randint(1,2)
```

```
if choice == 1:
        text = "Concentrate and ask again"
        picture = "concentrate.gif"
```

```
elif choice == 2:
        text = "Very doubtful"
        picture = "doubt.gif"
```

All on one line:
```
easygui.msgbox(msg=text,title="The Magic 8-
Ball",image=picture)
```
