

# Caesar Cipher Spreadsheet Encryption

	A	B	C	D	E
1	Key	1			
2		1	2	3	4
3	a	97	98	98	b
4					

1. = code (A3)
2. = B3 + B\$1
3. = if ( C3 > 122 , C3 - 26 , C3)
4. = char (D3)

## Challenges

1. Use the fill handle and drag down to row 30.
2. This spreadsheet only works with lower case letters.  
Change formula 3 to make it work with upper case letters.
3. Add a second worksheet and create a spreadsheet that will **decrypt** a message
