

## What was good

You have:

- Demonstrated good data handling skills with the spreadsheet/database task
- Used image editing techniques effectively
- Shown that you can work independently
- Described what you have done clearly

## Improvements

You could have:

- Shown more understanding of how to manage data in a spreadsheet/database
- Thought about colours / layout more carefully
- Tried to solve problems more independently
- Talked about the skills you have used in more detail in order to demonstrate your learning

## Next Steps

- Say which parts of this project were easiest & hardest - why?
- Suggest at least 3 other IT tasks Aunt Mabel might need help with at the zoo
- Consider whether it is better for everyone to have some IT skills or for a few people to have specialist IT skills.
