

What was good

You have:

- Shown that you can read Python code
- Debugged and edited code to improve it
- Written your own code using sequencing and selection (if statements)
- Shown resilience in solving problems

Improvements

You could have:

- Tried to solve more problems independently
- Edited code to show you can improve it
- Added more of your own ideas by extending the code
- Annotated your code in more detail

Next Steps

- Say which activity you enjoyed the most in this topic, and why
- Explain why If statements are really important in programming
- Write an argument for why all KS3 students should learn at least a little bit of programming

Student Response
